2028_REC_OOPS using Java_Week 2_Q8

Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

A bank generates secure codes using 3-digit numbers where each digit is unique, and the code must be divisible by 3. You are tasked with generating the first N such codes based on user input, ensuring the digits are unique and the number is divisible by 3.

Note: Use nested for loops to solve.

Input Format

The first line contains an integer N representing the number of valid codes to generate.

Output Format

The output prints N lines, each line contains a valid 3-digit code.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 5

Output: 102

105

108

120

123

Answer

```
// You are using Java
import java.util.*;
```

```
class sample{
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        int n = sc.nextInt();
        int count = 0;

        for(int i = 1; i<=9 && count <n; i++) {
            for(int j = 0; j<= 9 && count <n; j++) {
                if(j == i)
                    continue;
                for(int k = 0; k<=9 && count<n; k++) {
                    if(k == i || k==j)
                        continue;
                    int num = i * 100 + j*10 + k;
                    if(num%3 ==0) {
                        System.out.println(num);
                        count++;
                    }
                }
            }
        }
        sc.close();
    }
}
```

Status : Correct

Marks : 10/10
